[Federal Categorical Facilities.pdf](#)

Final round, which are 2 permits issued to Federal categorical facilities (Metal Finishers):

- ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ Applied Nanostructures
- ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ Caliper Life Science

Caliper is closed and no longer operating.

All of the permits provided represent current or most recent operations and does not reflect historic facility operations in the area.

Please call if you have questions.

Eric

Subject: Follow-up EPA data request to City of Mtn View

Hi Alison,

EPA has a few follow-up items we need. Please provide

- Copy of 501 Ellis Street (NEC/Reneas/Geosyntec) industrial waste water permit including permit discharge requirements/limits, and any reporting data, as well as any other industrial discharge permits to the Ellis St, Whisman Road, or Fairchild Drive sanitary sewer trunk lines in the area.
- Planned / priority replacement schedule of the Fairchild Drive sewer trunk lines, National Avenue, Ellis Street, N Whisman Road
- Clarification/Confirmation on previous (e.g. questions about the abandoned line at 100 Ferguson and whether the Moffett and Leong sewer lines ever connected).
- Abandoned line at the former GTE Facility (100 Ferguson Dr)
 - The GIS data indicates that there is an abandoned line that extends approx. 340 feet. When was this line abandoned? Why was it abandoned? Was it abandoned in place?). City: *Please provide a vicinity map* **EPA: See attached map (20140408_100Ferguson)**
- Moffett Blvd and Leong Sewer lines
 - Did the Moffett Blvd and Leong sewer lines ever connect? For example, was there ever a line connecting manholes F5-067 and F5-073?

City: Don't understand question? I don't see F5-67 Look at F5 system map. Moffett Blvd was renamed Leong when the freeway connector was constructed . The freeway connector was named Moffett Boulevard and the State typically doesn't allow for longitudinally placed utilities

- **EPA: The attached map highlights the F5-067 and F5-073 manholes (20121017_F5_Sanitary Sewer Map_[967]_Markup). The 1960 as -build posted to Dropbox (Record drawing 2660) seems to show that the sewer lines did not connect. However, please confirm.**

Thanks for all your help in providing all the information. Please let me know if you have any questions.
